

Those skilled in the art would clearly understand this feature, for either guides 412, 442 (in claim 2) and grooves 412, 442 (in claim 10). The Examiner is referred to elements 441 and 442 which carries the extension portion of the handle, that ride in the guides 412, 442.

IN THE ABSTRACT

No changes.

IN THE DISCLOSURE

No changes.

IN THE CLAIMS

Please amend the following claims.

1. A window assembly comprising, a jamb having an interior, defining a jamb pocket portion and a retractable screen disposed with a screen cassette contained within [a] the jamb pocket portion [of a] integral with the jamb of the assembly, said jamb and said jamb pocket portion being manufactured as an integral unit when the window assembly is formed, said jamb pocket portion being defined by three sides of the interior of said jamb, the screen accumulating on and paying out from a spring biased roll provided with said cassette disposed within said jamb pocket portion[, the screen being retractable for egress or cleaning purposes, and available as desired].
2. The window assembly of claim 1 further comprising sill and header portions wherein said retractable screen is guided in guides provided with said sill and

header[,] portions of the window assembly which allows for the manufacture of heavier screens in larger sections.

10. The window assembly of claim 2 further comprising grooves disposed adjacent [to] the header and sill [framing sections] portions to receive an extension portion of a handle of the retractable screen [cassette assembly] also engaged with keyed edges of the screen and at the same time engaging the grooves to maintain the parallelism of top and bottom portions of the handle when in motion as the screen is payed out and accumulated [on the screen roller contained with] in the jamb pocket provided in the [frame] jamb.

REMARKS

Claims 1, 2, and 10 now stand rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant in their amendments have addressed every point raised by the Examiner.

Claims 1, 2 and 10 now stand rejected under 35 U.S.C. 102(b) as being anticipated by Johnston. Johnston discloses a "door closure for a door" having a pair of jambs (12 and 13), and a separate (separately manufactured and not integral) retractable spring biased screen assembly 16 (installed on jamb not contained in a manufactured pocket) comprising a screen (11) and a housing (17) and a veil of closure material (18). The screen is guided within guides to and from said housing (17).
